

Hello and welcome to another edition of the Fuel Cell Today fortnightly newsletter, bringing you the latest information on the fuel cell industry.

...

In a first for the UK, it has been reported that London's Arcola Theatre has installed a hydrogen fuel cell to power its café/bar and selected main house shows. The 5kW IdaTech ElectraGen system has been supplied by London Hydrogen Partnership with additional funding from the UK Department for Culture Media & Sport, Arts Council England, the London Borough of Hackney and the Mayor of London's Greening London Theatre Initiative. Hydrogen for the fuel cell has been supplied by BOC gases. Fuel Cell Today hopes to be able to report more projects like these as they come online.
